AAV VECTOR CORE AUXILIARY DIRECT COST

Services	Description		Cost
Plasmid Transformation	Incoming DNA transformed into competent cells, characterized and stored.	$	268.00
Plasmid Preparation for AAV Production	4LPlasmid DNA Preparation by CsCl and characterization	$	442.00
Plasmid Preparation for AAV Production	2.5L Plasmid DNA Preparation by EndoFree Qiagen Mega Kit and characterization	$	353.00
AAV Vector Preparation	Transfection of ONE CellStack, cell culture, purification by iodixanol and/or columns, concentration, vialing, storage	$	2,630.00
	Each Additional CS pooled with the first CS (up to 4 addtn')	$	1,340.00
AAV Vector Preparation Characterization (QC)	Purity/Identity by Silver Stain PAGE (per preparation)	$	70.00
	Vector Genome Titer by Dot-Blot (per preparation)	$	92.00
Controls	AAV-Marker control preparation @ 25uL	$	75.00
	AAV-Marker control preparation @ 100uL	$	300.00
AAV Vector Preparation - Small Scale	Transfection of 5 Triple Flasks, Harvest, purification by Iodixanol only, concentration, vialing	$	875.00

Optional Services	Description		
Optional AAV Preparation QC Testing	Infectious titer by Green Cell Assay (GCA)(per preparation)	$	345.00
Optional AAV Preparation QC Testing	Vector Genome Titer by Q-PCR (CMV, CBA, SV40polyA)(per preparation)	$	388.00
Endotoxin Removal	Endotoxin removal for plasmid preparations (per preparation)	$	125.00
	endotoxin removal for AAV preparations (per preparation)	$	182.00
Endotoxin Testing	determination of level of endotoxins in plasmids and AAV preparations (per preparation)	$	883.00
